

TraceMail™ is a simple yet powerful message control tool that enables businesses to easily protect and manage their emails... Even after they have been sent.

Have you ever hit "send" on an email and then instantly wished you hadn't?

Have you ever worried about who your emails might be forwarded to?

Have you ever received a "reply to all" that wasn't intended for you?

Have you ever been frustrated because you weren't able to email a large file?

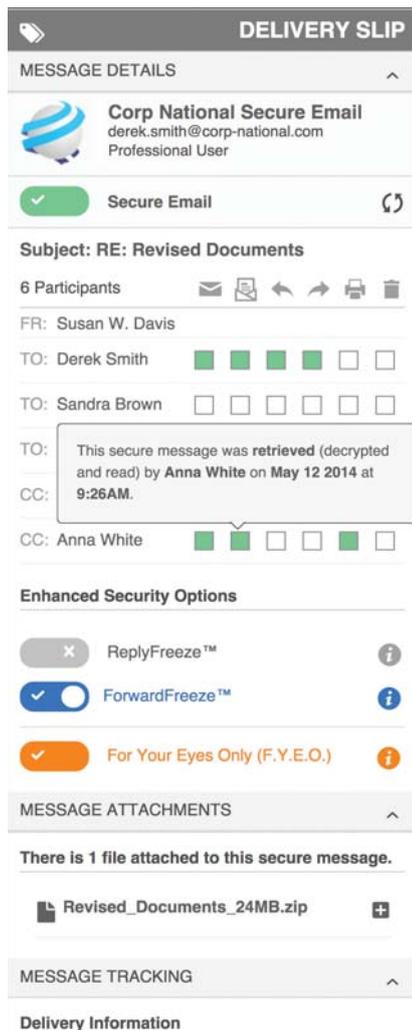

The prevalence of email as a business tool underscores the need for organisations to secure their messages and attachments. The loss of company data, whether accidental or intentional, poses a real threat to the bottom line of every business. TraceMail™ provides a cost-effective solution to email's many vulnerabilities, allowing businesses to securely protect and track the exchange of information. Far more than a traditional encryption tool, TraceMail™ delivers a secure communications platform that empowers greater collaboration and productivity.

FREE
30 Day Trial

TraceMail™ integrates with existing email addresses and infrastructure, so no technical expertise is required to start sending secure messages.

For an obligation-free, 30 day trial please contact 1300 885 812

Build your brand

Establish a reputation of trust and security so that clients and associates feel confident sharing information.

Prevent Data Loss

TraceMail integrates with any existing data leak prevention (DLP) engine and offers "intelligent content scanning" so companies can automatically prevent the sharing of sensitive information.

Secure Large File Sharing

TraceMail enables users to quickly and securely send and receive file attachments of up to 5GB without overloading inboxes.

Customizable Secure Environment

TraceMail provides businesses with a dedicated "slice" of the secure cloud and is fully customizable to security policies. Every TraceMail portal is custom-branded and encrypted for a seamless user experience.

Seamless Integration

Easily and securely send, receive and track messages from your existing email such as Outlook, Office 365, Gmail or Lotus Notes.

Cost effective and lowers overheads

Reduce the need for postage, fax lines and machines, couriers, and SMS and voice services for appointment reminders. TraceMail also eliminates the costs associated with paper shredding and paper file storage.

For Your Eyes Only (F.Y.E.O.)

Optional F.Y.E.O. password protection to block anyone else who might have access to your messages.

Instant Message Recall

Revoke messages and attachments sent in error even after it has been read. Messages can also be set to expire at a later date.

Secure mobile messaging

Compatible with smart phones and tablets, remote employees can send sensitive information and large files from anywhere, on any device.

Non-technical and zero maintenance

Utilising existing hardware, TraceMail deploys in minutes, requires no outside expertise to set up and needs no on-going maintenance.

Privacy compliance and electronic discovery

Full support for the spectrum of information privacy and security regulations. For e-discovery purposes, TraceMail ensures messages are verified and intact, and provides proof about whether messages were received, read, replied to or forwarded using date and time stamps.

Integrates with any existing archiving system

Secure messages can be automatically decrypted into any archiving solution, allowing them to be indexed for audit and e-discovery purposes.

Advanced Message Control

TraceMail's patented "Delivery Slip" notifies users in real time when an email is received and read and enables them to control whether it can be replied to or forwarded. TraceMail's proof of delivery prevents false claims of non-delivery.

Extend the power of TraceMail™ with Secure Web Forms™

Are you in a regulated industry where confidential information on paper is a risk (i.e. target for theft, potentially misplaced, exposed on fax machines)?

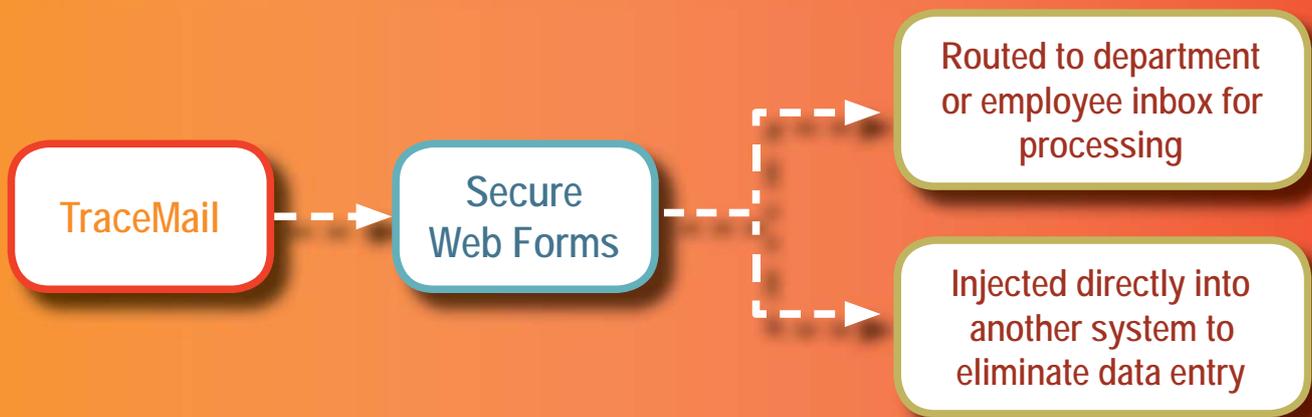

Does information on paper forms have to be manually keyed into a system?

Is it important for your clients to know their privacy is respected and protected?

If your business uses forms to capture sensitive client details, it could benefit from the advanced secure web form features of TraceMail.

TraceMail's Secure Web Forms eliminate the risks associated with using paper-based forms such as storing and disposing of confidential information, misinterpreting handwriting and data entry errors. They also remove the need for mailing, faxing and scanning in documents, helping to you to deliver goods and services faster, easier and more securely.

For more information, please contact rhipe on 1300 885 812.

TraceMail™ is provided as part of rhipe's Cloud Solution Provider Program (CSP). With CSP, partners can continue to own the customer relationship and service the complete customer lifecycle. Utilising dedicated in-product tools to directly provision, manage and support their customer subscriptions, partners can easily package their own tools, products and services and combine them into one monthly or annual customer bill. rhipe can help build your client relationships, providing you as much or as little support as you need for any products under the Cloud Solution Provider program.

For more information contact rhipe on 1300 885 812 or email enquiries.au@rhipe.com
